Introduction to RefWorks

To begin using RefWorks to collect and organize citations for your research and create bibliographies, you will first need to set up an account.

- Go to the JSU RefWorks Information page at http://ereserves.jsu.edu/notes/refworksnote.html
- Click on the Create Account link.
- Enter your JSU e-mail address and click the Check button.
- When you get a "success" message back, you will be asked to create a password.
- When you get an activation email, you need to validate your e-mail address to continue.
- After you validate your e-mail, you will be re-directed to RefWorks where you will enter your name, role (student, faculty, etc.), and department affiliation.

Once these steps are complete and your account is created, you can go to the RefWorks page at https://refworks.proquest.com/ and log in using your JSU email address and your password.
